

Risk Management and Audit Committee (RMAC) **BUSINESS PAPER** **TUESDAY 1/09/2020**

Meeting to be held commencing 10.00am
In Executive Meeting Room at 7 Bees Creek Road, Freds Pass

Daniel Fletcher, Chief Executive Officer

Any member of Council who may have a conflict of interest, or a possible conflict of interest in regard to any item of business to be discussed at a Council meeting or a Committee meeting should declare that conflict of interest to enable Council to manage the conflict and resolve it in accordance with its obligations under the Local Government Act and its policies regarding the same.

LITCHFIELD COUNCIL RMAC MEETING

Notice of Meeting

to be held in the Executive Meeting Room, Litchfield
on Tuesday, 1 September 2020 at 10.00am

Daniel Fletcher
Chief Executive Officer

8. Officer Reports

RMAC REPORT

Agenda Item Number:	8.1
Report Title:	ICT Security Audit
Recommending Officer:	Silke Maynard, Director Community and Corporate Services
Meeting Date:	1/09/2020
Attachments:	Nil

Executive Summary

This report is to present RMAC the preliminary findings and key recommendations of the ICT Security Audit Report 2020.

Recommendation

THAT RMAC:

1. Receive update on the ICT Security Audit; and
2. Request that the final ICT Security Audit report with management responses be presented at the next meeting.

Background

Fourier Technologies was engaged by Litchfield Council to perform an audit of Council's ICT systems and processes. The review was performed in June 2020 and a draft report created to present the findings of the review and recommended actions to address areas of risk. The review of the draft report has highlighted the need for amendments to some of the assumptions made by the consultant. The consultant has made assumptions regarding Council's risk appetite that lead to a number of recommendations that are unrealistic based on Council's risk profile and financial capacity.

The draft report at this stage has identified 33 actions categorised in the following way:

Risk	Description/Action	Number
High	Senior Management Attention needed. Failing to implement this recommendation as soon as possible introduces a high probability of loss of some sort.	6
Moderate	Management responsibility must be specified. Its I possible that failing to implement this recommendation will result in a loss of some sort. Rectification should be performed at the next scheduled maintenance.	12
Low	Manage by routine procedures. This issue should be considered during normal administrative duties and planning processes.	11
Information	Informational possible exposure.	4
	TOTAL	33

Out of the identified six high risks, four are already actioned as part of the server exchange (renewal) project currently in progress. The other two high risks are related to the notification process of Council's renewed firewall and can be addressed internally without adding further costs.

Council officers are working with the consultant to finalise the audit report and address the identified risks. The full report with management response, required actions with timelines and budget implications will be presented to the next RMAC meeting. Furthermore, Council will ensure that any relevant findings of the audit will be included in Council's Risk Management Register for monitoring (as internal controls or treatments).

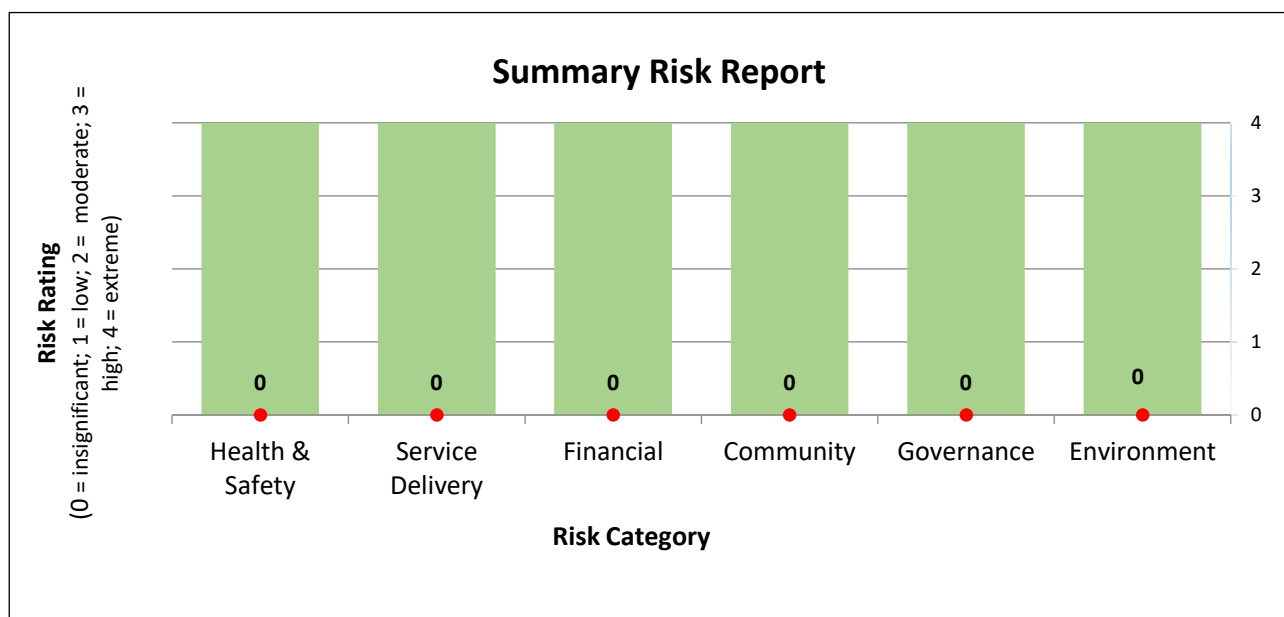

Links with Strategic Plan

A Well-Run Council - Good Governance

Legislative and Policy Implications

Internal audits for the 2019/20 financial year are now complete with the finalisation of the ICT security audit report. Internal audits for the 2020/21 financial year will commence in accordance with the 3 year internal audit plan.

Risks

Council is actively auditing processes and therefore reducing any risk to the organisation. This report does not identify any particular risk to Council.

Financial Implications

Audit was undertaken within the 2019-20 budget.

RMAC REPORT

Agenda Item Number:	8.2
Report Title:	Interim Audit Report – 2019-20
Author:	Arun Dias, Finance Manager
Recommending Officer:	Silke Maynard, Director Community and Corporate Services
Meeting Date:	1/09/2020
Attachments:	Attachment A - Interim Audit Management Letter

Executive Summary

Merit Partners conducted the interim audit for Litchfield Council in May 2020 for 2019-20. This report provides a summary of audit findings as part of the Interim audit. The findings in the interim audit on internal controls are not considered complete until the conclusion of the Final audit. In summary, three risks were identified and were given an overall 'low' risk rating.

A low risk rating requires some improvement. It is classified as a weakness which does not seriously detract from the system of internal control and/or operational effectiveness/ efficiency, but which should nevertheless be addressed by management.

Management concurs with the audit findings and will enhance and review existing processes and ensure existing internal controls are followed by reviewing audit maintenance reports for changes as part of the certifying process for Payroll and Accounts Payable. An additional check will also be carried out to increase sample testing for GST transactions.

Recommendation

THAT RMAC note and receive the Interim Audit Management Letter for 2019-2020.

Background

Merit Partners have conducted the Interim audit for 2019-2020 and have highlighted three areas of audit observations. All three areas are classified as Low risk and do not indicate any material deficiency in existing internal controls.

There has been an observation of two instances where GST was incorrectly recorded at Thorak Cemetery. Management agrees with the audit recommendations of enhancing the existing review process for coding of GST transactions. We note, whilst no single process will guarantee 100% accuracy nevertheless, the existing process as part of the Business Activity Statement (BAS) can be refined to increase the sample size of testing for accuracy of GST transactions.

The second and third audit observation relate to instances where there was one instance each of a lack of reviewing of the audit maintenance report for accounts payable and payroll.

Management agrees to the recommendations by ensuring audit maintenance reports are verified and reviewed as part of the certifying process. This provides assurance of changes to Master details in the Corporate Systems have followed and passed through all the checks and balances prior approval.

PRIVATE & CONFIDENTIAL

Attention: Arun Dias

Dear Arun

Interim Audit of Litchfield Council – 30 June 2020

In order to carry out our duties and responsibilities as auditors, Merit Partners is required by ASA 260 *Communication to Those Charged with Governance* ("ASA 260"), to communicate to you setting out the following matters in respect of the audit of the above named organisation.

We have partly conducted our internal control testing procedures during our interim audit of Litchfield Council. These procedures will be completed during our final audit site visit. This letter communicates our findings from procedures conducted to date.

Internal control themes and observations

As part of our audit of the financial reports, we have obtained an understanding of internal controls sufficient to plan our audit and determine the nature, timing and extent of testing performed. Although our audit is not designed to express an opinion on the effectiveness of internal control we are required to communicate to you significant deficiencies in internal control.

The matters reported in Appendix A – Audit Recommendations are limited to those deficiencies that we identified during the audit to date and that we concluded are of sufficient importance to merit being reported to you.

This letter has been prepared for the sole use of management and others within the Council. It must not be disclosed to a third party or quoted to or referred to without our written consent. No responsibility is assumed by Merit Partners to any other person.

Yours faithfully

Matthew Kennon

Director

Appendix A Audit Recommendations

The following table summarises the key issues and their risk ranking.

	High Needs significant improvement	Moderate Needs substantial improvement	Low Needs some improvement
Internal Control Weaknesses – Receipts (Thorak)			✓
Internal Control Weaknesses - Expenses			✓
Internal Control Weaknesses - Payroll			✓

Overview of Risk Ranking System

Though we have rated each finding individually on a stand-alone basis, you should also assess the collective impact of these matters, together with other findings from within the Council.

High Needs significant improvement	Immediate corrective action is required. These recommendations relate to a serious weakness which exposes the Council to a material extent in terms of achievement of corporate objectives, financial results or otherwise impair the Council's reputation.
Moderate Needs substantial improvement	Corrective action is required, generally within 6 months. A control weakness, which can undermine the system of internal control and/or operational efficiency and should therefore be addressed.
Low Needs some improvement	Corrective action is required, generally within 6 to 12 months. A weakness which does not seriously detract from the system of internal control and/or operational effectiveness/efficiency but which should nevertheless be addressed by management.

Disclaimer

Issues identified are only those found within the course of our interim audit for the year ended 30 June 2020. Recommendation issues are intended solely for the use of the Council's management. We disclaim any assumption of responsibility for any reliance on this report, to any person other than the Council or for any purpose other than that for which it was prepared.

Appendix A Audit Observations - continued

Observation	Effect	Risk category	Recommendation	Management Response
Internal Control Weaknesses – Receipts (Thorak) We noted during our controls testing 2 instances where GST had not been recorded correctly.	Increased risk that GST is not being correctly recorded and/or reported to the Australian Taxation Office.	Low	We recommend that all transactions are checked to ensure that GST is correctly treated in the accounting system.	
Internal Control Weaknesses - Expenses From a sample size of 25 samples selected as part of our testing of controls over the expense process, we noted one instance in which the audit maintenance report was not reviewed. We also noted during our controls testing 2 instances where purchase orders were raised after the invoice was issued.	The absence of review of the audit maintenance report increases the risk of fraud or error. By not utilising Purchase Orders correctly there is a risk that purchases may not have been authorised by an appropriate person before being made.	Low	All payment and procurement policies and procedures should be adhered to.	
Internal Control Weaknesses - Payroll From a sample size of 10 samples selected as part of our testing of controls over the payroll process, we noted one instance in which the audit maintenance report was not able to be provided.	The absence of appropriate supporting documentation for transactions increases the risk of fraud or error.	Low	Supporting documentation and an adequate audit trail should be maintained for all transactions incurred.	

RMAC REPORT

Agenda Item Number:	8.3
Report Title:	Procurement Improvement Committee Update
Recommending Officer:	Daniel Fletcher, Chief Executive Officer
Meeting Date:	1/09/2020
Attachments:	Attachment A - PIC Outstanding Action List Attachment B - PIC Minutes 15 July 2020 Attachment C - Draft Project Management Guidelines

Executive Summary

This report provides an update on outstanding items in the Procurement Improvement Committee (PIC) action list following the last PIC meeting held in July 2020.

A total of 72 Complete and 30 In progress actions are recorded with details in the following table showing the source audit/ review documents;

Audit/ Review Document	Complete	In progress	Grand Total
2016 December Council Report	2	1	3
2017 Procurement Audit	34	6	40
2018 Probity Review	17		17
2018 Procurement Maturity Roadmap	10	11	21
2019 Contract Management Audit	1	10	11
2019 RFQ Probity Review	8		8
Risk Action Sheet		2	2
Grand Total	72	30	102

The minutes for the July meeting are attached to this report as Attachment B.

Recommendation

THAT RMAC:

1. Note the content of this report.
2. Note minutes from the Procurement Improvement Committee dated 15 July 2020.
3. Note the updated Procurement Improvement Committee action item list.
4. Note the Draft Project Management Guidelines document as evidence of documents in progress.

Background

The majority of the outstanding actions relate to development of the Project Management Framework and Contract Management Procedures and development of the ancillary documents under the respective framework and procedure. The development of these documents is in-progress, see Attachment C for the Draft Project Management Guidelines document. In addition, there are many actions that are complete in practice, but not incorporated into a relevant procedure or framework at this time, which does mitigate any risk to Council in relation to these areas.

Attachment A provides a list of the current outstanding action items and their status.

Key Action/Document Required	Date For Completion	Action
Complaints Policy	Aug-20	Governance - Complaints policy development
Complaints Policy Total		1
Contract Management Procedure	Sep-20	Contract Management - Contractor performance reports
		Contract Management - Monitor and report on KPIs
		Contract Management - Review variation procedures and implement changes as identified
		Develop a standard Progress Payments template to support the request for interim contract payments that are submitted to Directors for sign off
		Develop checklist for current and new contracts, including documentation required
		Develop Contract Management System
		Develop process of internal approval of cost variations, including written acceptance to the contractor
		Develop variation procedure and template, to be included in Project Management Framework
		Include checklist in Project Management Framework
		Include contractor performance (KPI's, reports and issues) in checklist, to be included in Project Management Framework
		Include kick-off meeting in checklist, to be included in Project Management Framework
		Include records of contractor performance in checklist, to be included in Project Management Framework
		Include site visits in checklist, to be included in Project Management Framework
		Planning - Contract expiry review and respond
		Planning - Post contract reviews pre tender
Contract Management Procedure Total		15
Project Management Framework	Dec-20	Contract Management - Supplier engagement surveys
		Develop Project Management Framework
		Enablers - Contract Management System planning
		Enablers - Procurement Community of Practice
		Extend the requirement for all capital projects to be supported by Project Briefs as part of the budget development process
		Include risk assessment in Project Management Framework
		Planning - Capital bids
		Require that more detailed Project Briefs are prepared and are authorised by a Director prior to commencing any procurement activity
Project Management Framework Total		8
Training	Dec-20	Develop and implement Conflict of Interest training for existing staff and include it in Induction Training for new staff
		Enablers - Policy / procedure training
		Implement Procurement Audit Findings
		Provide contract management training for staff
		Provide training on tender evaluation for all staff involved in procurement activities
Training Total		5
Authority Contracts Module Procedure	Jun-20	Set up Contracts Module in Authority with accompanying procedure
Authority Contracts Module Procedure Total		1

Links with Strategic Plan

A Well-Run Council - Modern Service Delivery

Legislative and Policy Implications

Nil

Risks

Whilst the associated risks involved with Procurement policies and procedures are mostly mitigated by having those policies and procedures already adopted and utilised by specific staff members there does pose a slight risk where there are outstanding actions in ensuring all staff members within Council are trained and understand these documents. This will be further mitigated once the overall Project Management Framework is finalised and distributed for teams to review and acknowledge.

Financial Implications

All activities are within existing budgets

MINUTES

PROCUREMENT IMPROVEMENT COMMITTEE MEETING

Notice of Meeting
to be held in Executive Conference Room
on Wednesday, 15th July 2020

Daniel Fletcher
Chief Executive Officer

Number Agenda Item

1 Welcome

David Jan (MOE), Phil Joyce (MIA), Arun Dias (FM), Charissa Wust (WA), Silke Maynard (DCCS), Daniel Fletcher (CEO)

2 Apologies

Governance & Risk Advisor

3 Disclosures of interest

Nil

4 Outstanding Action Items

4.1 Vendor Panel proposal

MIA to provide update regarding suitability of system

Not progressed.

ACTION:

Report to be presented to next PIC, Wednesday 14th October 2020, 9am.

To include:

1. Authority options completed first (FM), then;
2. Another SaaS program (MIA).

Links to item #65 of PIC

4.2 Confirm Risk Register updated by GRA

Completed.

<https://infoXpert.edrms/docs/CORPORATE%20MANAGEMENT/RISK%20MAN>

[AGEMENT/Risk%20Register/Risk%20Profile%20%20Reporting%20Tool.xlsm?Login=True](#)

4.3 Confirm training requirements as determined by MIA and FM

UPDATE:

Not progressed

ACTION:

Training for ALL STAFF to be undertaken and completed by next PIC, Wednesday 14th October 2020, 9am.

1. Leadership Team meetings and
2. All staff meetings

5 Ongoing Action Items

5.1 Action Sheet

<https://infoXpert.edrms/docs/CORPORATE%20MANAGEMENT/MEETINGS/Procurement%20Improvement%20Committee/PIC%20Improvement%20Actions.xlsx>

Review – Due dates and timeframes

Outstanding/ Overdue Actions

REVIEWED AND UPDATED.

5.2 Consideration of KPIs for Reporting Purposes

Actions from previous meeting; FM and MIA to circulate reports as follows;

- a. *Insufficient quotes (FM)*
- b. *Split orders (FM)*
- c. *Purchases where purchase order issued below procurement threshold and total invoices resulted above threshold (\$10,000, \$100,000) (FM)*
- d. *Total contact cost relative to awarded value (MIA)*

FM will provide update regarding reporting

MIA to provide update

ACTION:

A & B: Completed.

C: Carolyn update. It's possible but requires more time.

FM to circulate reports (A&B) to PIC and Jaimie to add as standing agenda items for PIC.

UPDATE:

MIA – information difficult to get out of system.

ACTION:

MIA to provide report outcome to PIC

6 General Business

7 Next Meeting

Wednesday 14th October 2020, 9am

Project Management Guidelines

Contents

Before you Start	3

SECTION 4 – Project Management Suite of Templates	29
SECTION 5 – Glossary of Terms	31
Need further assistance?	33

Before you Start

Do you need assistance in managing a basic project (e.g. the project is low risk, low cost or has a short timeframe)?

If your answer to this question is 'Yes', then you may only need the **MINI project plan** which is available in the Suite of Templates listed at the end of these guidelines.

The **MINI project plan** is a minimum requirement to assist you in managing a project at Council.

DO YOU NEED ASSISTANCE IN MANAGING A MORE COMPLEX PROJECT?

If your answer to this question is 'Yes', then please consider these guidelines in more detail as it outlines project management phases and provides you with a large range of supporting templates to assist you.

SOME TIPS ON HOW TO USE THESE GUIDELINES

Hyperlink to further information about a concept.

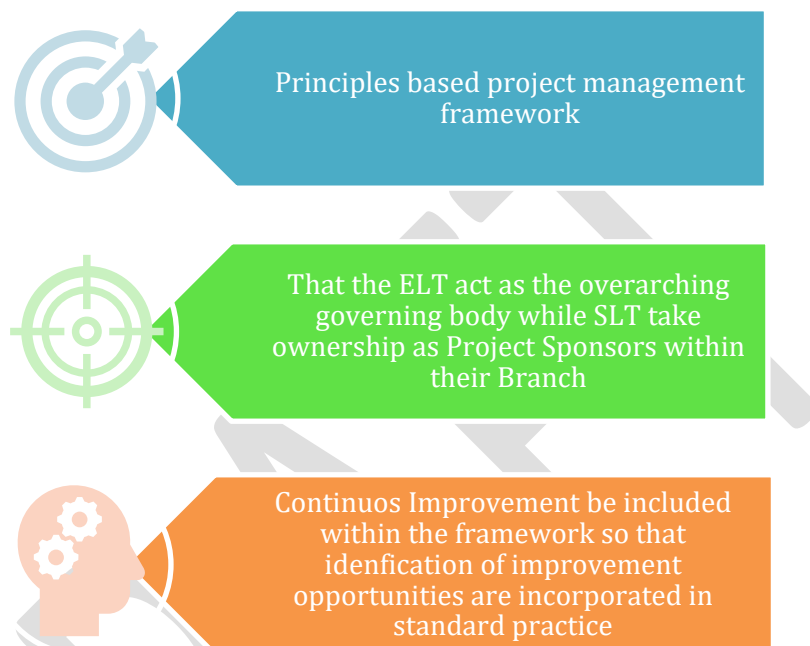

Checkpoints. Suggestions on processes to complete at the end of a project lifecycle phase.

Hyperlink to a template.

Glossary.

i. Background

The importance of having an established standardised corporate approach to project management practices is critical to successful project management. The key principles the Litchfield Council Project Management approach is based on include:

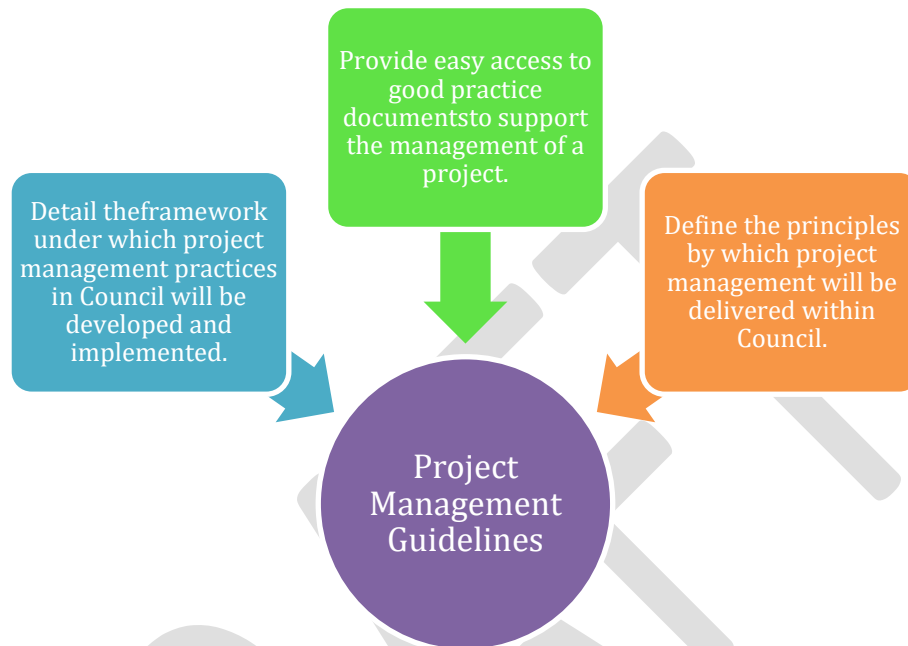

An internal working group is to be established to assist in the development of the project management approach that will achieve the needs of our Council.

The guidelines and principles were developed by the internal working group of staff from across the organisation and were endorsed by ELT on xx xx xx. A formal review of these guidelines is conducted yearly by the SLT to ensure that best practice is being adhered to and any improvement opportunities have been actioned.

ii. Purpose of these Guidelines

The primary purpose of these guidelines is to:

In addition to the above, these guidelines will help:

- Promote a consistent and corporate wide approach to project management.
- Promote a cycle of continuous improvement in the management of Council projects.
- Promote stakeholder engagement.
- Embed standardised risk management practices.
- Embed improved performance management practices

SECTION 1 – PROJECT MANAGEMENT OVERVIEW

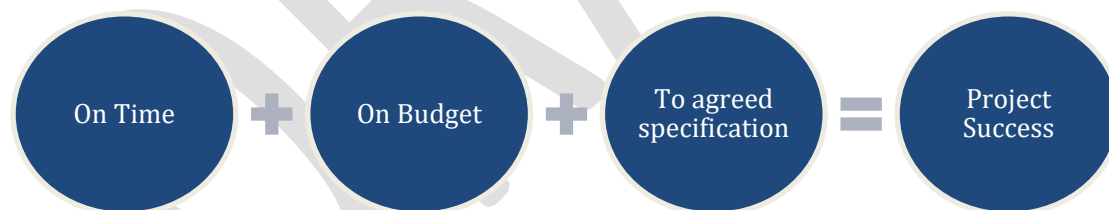

As a Council employee in today's fiscal economic environment, you face significant challenges in completing your work in a way that reduces cost and wastage, but at the same time, adds value to either the community or the organisation.

Good project management practice is crucial to the success of any local government and is a highly valued and transferable skill for any employee. These guidelines provide advice and resources to help build your project management practice and to promote project success.

Project management planning also enables you and your team(s) to have a consistent understanding of any project and its progress to date. Project management planning is extremely important for succession planning. Project management plans allow new staff or new project team members to be orientated in an efficient way to the purpose and benefits of a particular project and what work needs to be completed in order to achieve project success.

1.1 What is Project Management?

Project management is the use of a disciplined approach to the planning, implementation and monitoring of resources to ensure a project is successfully completed. Project success has been achieved when the following criteria have been met:

1.2 What is a Project?

A project is a **temporary** piece of work that creates a unique product, service or result. When a project has been approved to commence, a project manager is assigned to the project and is delegated responsibility and authority to manage the project in order to deliver to agreed specification, schedule and budget. Projects are not just about bricks and mortar, but can be any activity that has clearly defined start and end dates and can be for example:

1.3 Project Management Methodology?

There are a range of different approaches to project management. Some project management methods include PMBOK (Project Management Book of Knowledge), Prince2, Agile, Critical Chain, Process-based and Benefits realisation. At Litchfield Council, we have drawn on PMBOK to create our own customised project management methodology. The purpose of these guidelines is to outline the project management method used by Litchfield Council.

1.4 What is a Project Lifecycle?

Every project has a lifecycle. The lifecycle spans from the beginning to the end of the project's life. In project management practice, projects are best managed in phases (otherwise known as stages). Different project management methods use different terminology to explain their lifecycle phases and can differ in the number of phases they use to manage a project. At Litchfield Council, we use a **FOUR PHASE LIFECYCLE** to manage projects. Our four-phase lifecycle is compared with the PMBOK lifecycle in the illustration below:

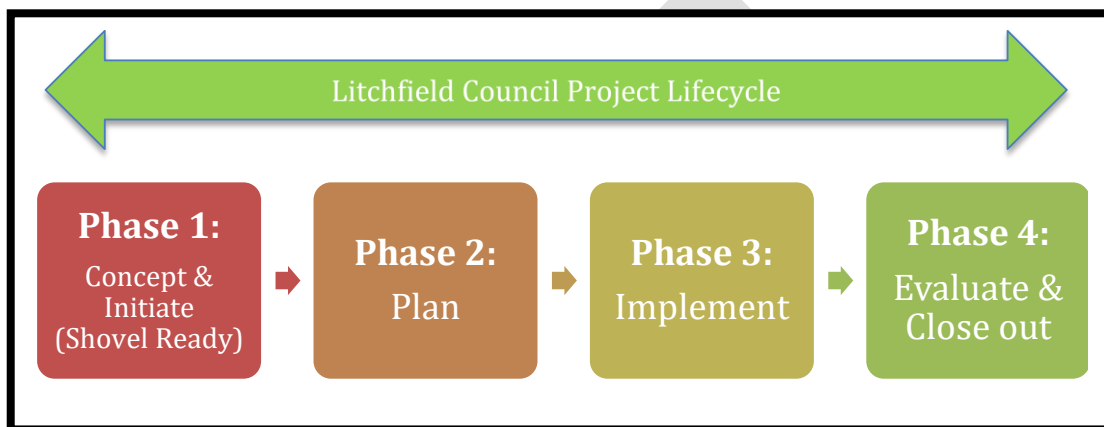

Figure 1: Litchfield Council Project Management Project Lifecycles

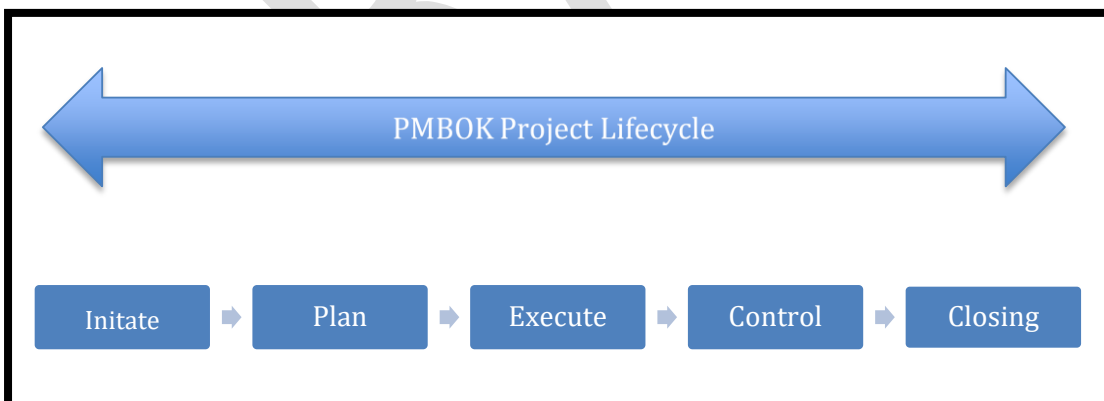

Figure 2: PMBOK Project Lifecycles

SECTION 2 – THE PHASES OF THE PROJECT LIFECYCLE

As you can see from Figure1, the project lifecycle used at Litchfield Council is very similar to the PMBOK phases. We will now discuss each phase of Council's project lifecycle.

2.1 Phase 1 – Concept and Initiate

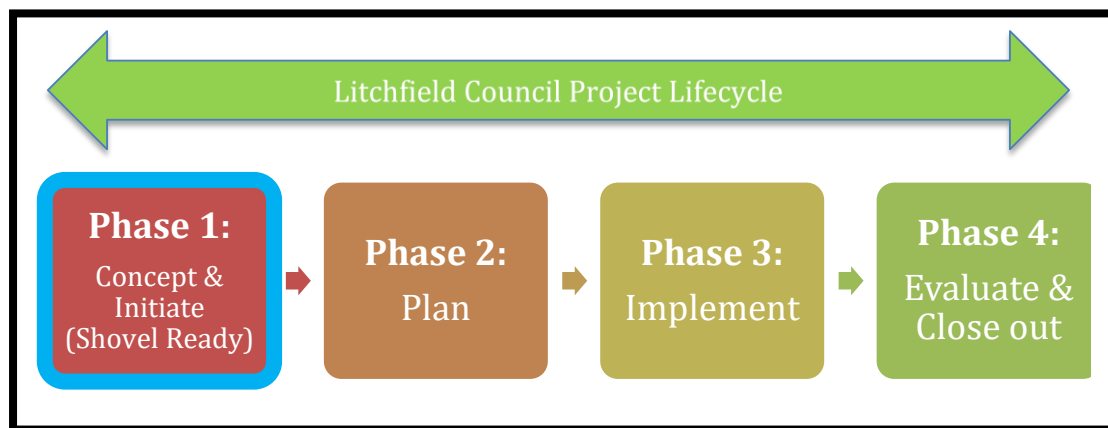

Figure 3: Phase 1

A PROJECT ALWAYS BEGINS AS A CONCEPT and therefore, phase 1 commences at the concept stage. Some projects are approved at concept stage without the need to establish a business case. For other projects, a business case may be sought before approval to commence a project is given.

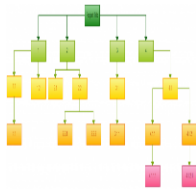

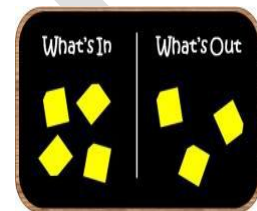

A **Business Case** is a document that builds an argument in order to gain approval to commence a project. The business case outlines the purpose, needs and benefits of the project.

During the concept stage, a **Feasibility Study** is sometimes completed to help establish the need for and benefits of a project. In a feasibility study, there is a discussion on whether there is sufficient knowledge/expertise, resources, capability/technology to undertake the project.

A **Project Charter** and Preliminary Scope Management Plan (PSMP) can also be completed in this phase. A project charter is usually used for three different reasons: authorizing the project, providing a high-level overview and identifying the main stakeholders. By contrast, a PSMP is a broad outline of the project and how it will be delivered and managed.

The PSMP will include a **Scope statement**. A scope statement lists among other things: the justification, description of the scope of the project, acceptance criteria, deliverables, exclusions, constraints and assumptions.

The PSMP also outlines a **Work Breakdown Structure**, resources, risks, stakeholders, **ROM Cost Estimate** and **Time Estimates**. If the project is approved to proceed, the PSMP will go on to inform the project plan which is developed in the planning phase (phase 2) of a project.

Once approval (project authorisation) has been given to commence a project, the **project sponsor** and **project manager** will need to be formally appointed. These two positions have a significant role in communicating to stakeholders that the project has commenced, its benefits to the organisation and the level and extent of stakeholder involvement and commitment.

Once the project has been formally communicated to the organisation, a **Kickoff meeting** can be organised which allows the newly formed project team to meet with the client, sponsor and project manager and to ensure all team members have a clear understanding of the purpose and scope for the project.

Phase 1 finishes with an authorisation to proceed (**Decision Gate**) to the next phase of the project lifecycle (phase 2: plan).

CHECKPOINT

Some key steps that may need to be completed in phase 1:
(Concept & Initiate)

- ✓ Complete a Business Case to justify a project
- ✓ Finalise the Project Charter to gain organisational support and commitment
- ✓ Develop a Preliminary Scope Management Plan which includes:
 - Scope statement
 - Project team structure and authorities
 - Work breakdown structure
 - Cost and time estimates
 - Broadly identify project AND safety risks
 - List possible stakeholders
 - Identify procurement requirements
 - Change authorisation - authority to make changes and to what level
- ✓ Assign the project sponsor, project manager and project team
- ✓ Hold the project kick-off meeting
- ✓ Seek approval to proceed to phase 2 of the project

2.2 Phase 2 – Plan

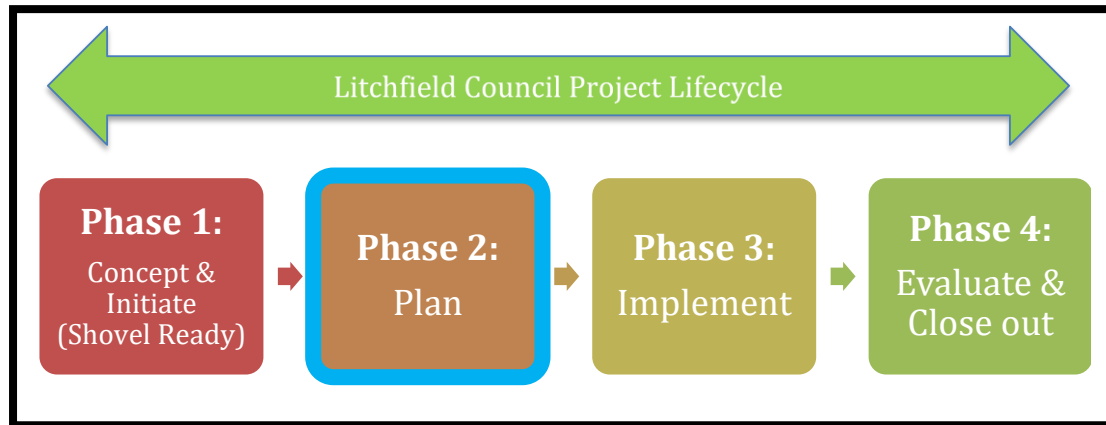

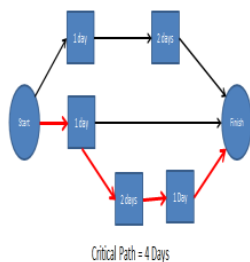

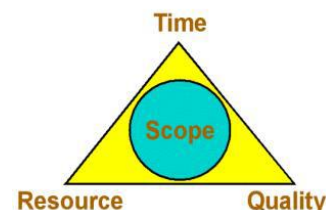

Figure 4: Phase 2

THE PLAN PHASE COMMENCES once the Concept & Initiate phase has been completed and approval has been given to proceed. The purpose of the Plan phase is to build more detail around the project activities, stakeholder needs, project risks and resource requirements that were initially documented in the PSMP.

THE PROJECT MANAGEMENT PLAN TEMPLATE is used for this purpose (available via Word templates by opening a new Word Document ie: New/Office of the CEO folder/Project Management Plan Template). The project plan has a significant number of components that need to be detailed and recorded to manage the project. If a PSMP has been developed for the project, you can copy the information into the project plan and then add more detail to each section if needed.

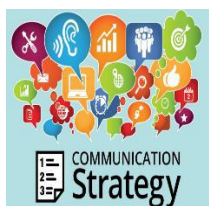

The **PROJECT SCOPE** needs to be clearly defined in the project plan. This includes outlining the project objectives and key deliverables, the inclusions and exclusions, start and end dates, project milestones and the work breakdown schedule (WBS).

The **Work Breakdown Structure** will include the **Performance Measurement Baseline** which in turn highlights the **Critical Path**. This will need to be finalised to enable accurate time estimates, resource estimates and a detailed cost estimate. A detailed cost estimate is a more accurate budget that would have a variance of no more than +/- 5% of the actual budget.

The governance structure also needs to be recorded including the roles, responsibilities and decision-making authorities of each role. The project plan should document the

access point for the location of the **Project Information System** (PIS). In Council, the general PIS is a file created in INFOEXPERT where all relevant information, documentation and knowledge generated for the development, delivery and evaluation of the project is stored. Good record keeping is essential for managing projects particularly in the event that a **RIGHT TO INFORMATION** application is submitted by an external stakeholder. Good **RECORDS MANAGEMENT** is a requirement under the Public Records Act (2002).

The project plan should also list any other supporting plans that will need to be created to support success in project delivery. These plans can be integrated into the project plan for small projects or can be stand-alone supporting plans. Some supporting plans can include: **risk management plan**, **communication plan**, **Quality Plan** and a **procurement plan**.

Once the project plan and any required support plans have been completed, the end of this phase requires an authorised person to sign off on the project plan and seek approval to proceed (**Decision Gate**) to the next phase.

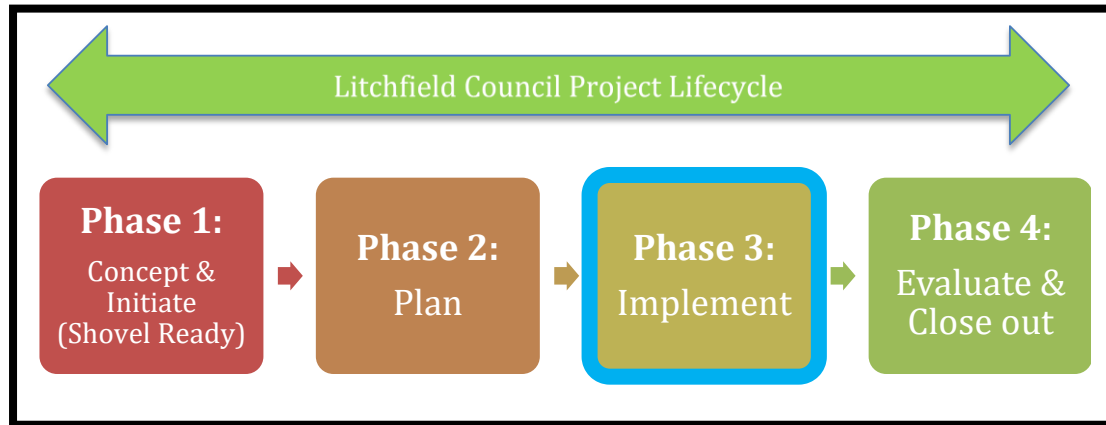

CHECKPOINT

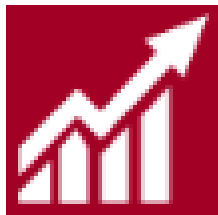

Some key steps that may need to be completed in Phase 2: (Plan)

- ✓ Develop the Project Information System (new file in DM)
- ✓ Finalise the project management plan.
- ✓ Seek approval to proceed to phase 3 of the project
- ✓ Finalise the communication plan.
- ✓ Complete a quality plan.
- ✓ Complete the risk management plan.
- ✓ Finalise procurement. (refer to the Procurement Manual on the buzz)
- ✓ Develop a detailed cost estimate (budget) and resource list
- ✓ Seek approval to proceed to the next lifecycle phase.

2.3 Phase 3 - Deliver

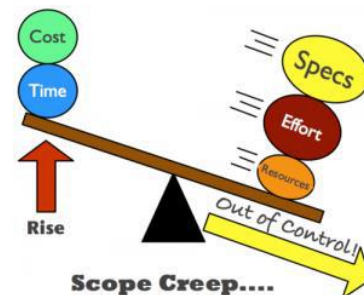

THE IMPLEMENT PHASE is the most productive of all the phases of the lifecycle.

It focuses on execution and control of the project through the implementation of key deliverables and outputs. This phase includes the ongoing management of stakeholders, risks, quality, resources, issues and reviews. Monitoring and reporting performance are a crucial component of this phase. Regular quality checks should occur during the Implement phase to ensure that the project is on track. As a minimum, major projects and their milestones must be captured and reported in Council's Quarterly Performance Update, minor projects reported to the ELT.

This phase is all about managing the project to keep it on schedule, to budget and to agreed specification. Throughout the implement phase, there may be changes and amendments and these need to be recorded and communicated to the project team. It is very important to **MANAGE THE SCOPE** of the project, as there is a significant risk of **Scope Creep** in this phase.

A change to scope needs to be addressed immediately. Any **CHANGE TO SCOPE MUST BE AUTHORISED** by the project sponsor and will require a new schedule and budget to be developed. A change of scope also requires that the project plan be updated. It is extremely important that the project manager controls and manages change throughout the life of the project. Therefore, **Change Control** is very important to project management.

During the implementation phase, it is extremely important to conduct **INTERIM PROJECT TEAM MEETINGS** to keep the team informed of progress, acknowledge achievements and thank team members. This will help maintain a positive attitude within the team. Once this phase has been completed, seek approval to proceed (**Decision Gate**) to the final phase.

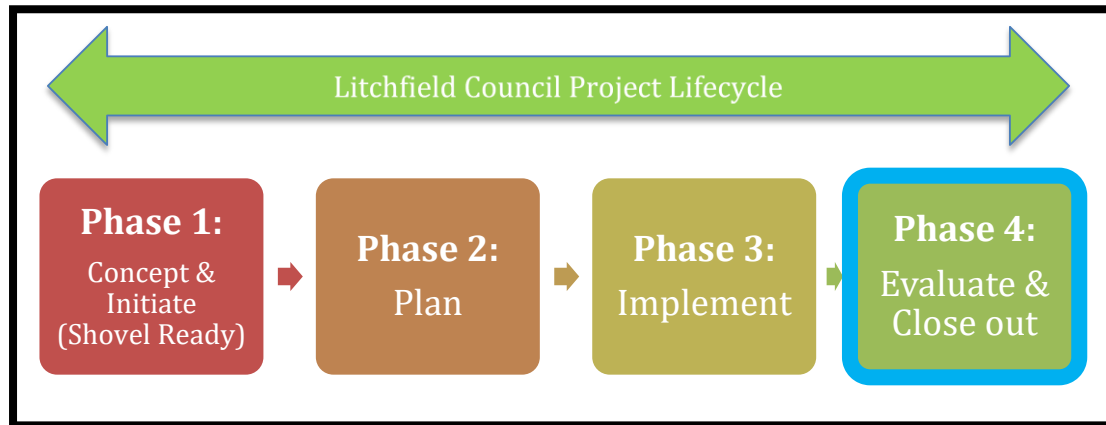

CHECKPOINT

Some key steps that may need to be completed in Phase 3:
(Implement)

- ✓ Update project management plan when necessary
- ✓ Update change control plan when necessary
- ✓ Seek approval to proceed to phase 4 of the project
- ✓ Conduct monitoring meetings
- ✓ Complete progress and performance reporting
- ✓ Review issues and modify processes where necessary
- ✓ Provide appropriate project updates to relevant stakeholders
- ✓ Complete mid-term evaluations if necessary

2.4 Phase 4 – Evaluate and Close

THE FINAL PHASE of the project lifecycle is important for continuous improvement. This phase involves the assessment and reporting of results of the project such as achievements, issues, consequences, ongoing implications and lessons learnt. Attention should also be given in this phase to tying up any loose ends to the project before formal closure of the project.

THE EVALUATION and closure section are located at the end of the project plan template and must be completed as part of the project evaluation. If consultants were used for the project, the consultant evaluation section also needs to be completed and is also found at the end of the project plan template.

For projects that involve a project team, it would be important and worthwhile to have a **CLOSURE MEETING**, acknowledging achievements and thanking everyone for their effort.

You may also be required or feel it beneficial to conduct an evaluation survey with some of the relevant stakeholders and the project team itself to gain **FEEDBACK** on how the project was managed or, for example, the effectiveness of the engagement techniques. The **Community Engagement Program** can provide advice on how to arrange a survey.

There might be a requirement to complete a stand-alone **EVALUATION REPORT** by the project sponsor. Therefore, stand-alone evaluation reports can also be developed during this final phase of the project. Evaluation reports are also known as close out reports, closure reports or project closure report. To see an example of a stand-alone evaluation report, you can access the example [Evaluation Report](#).

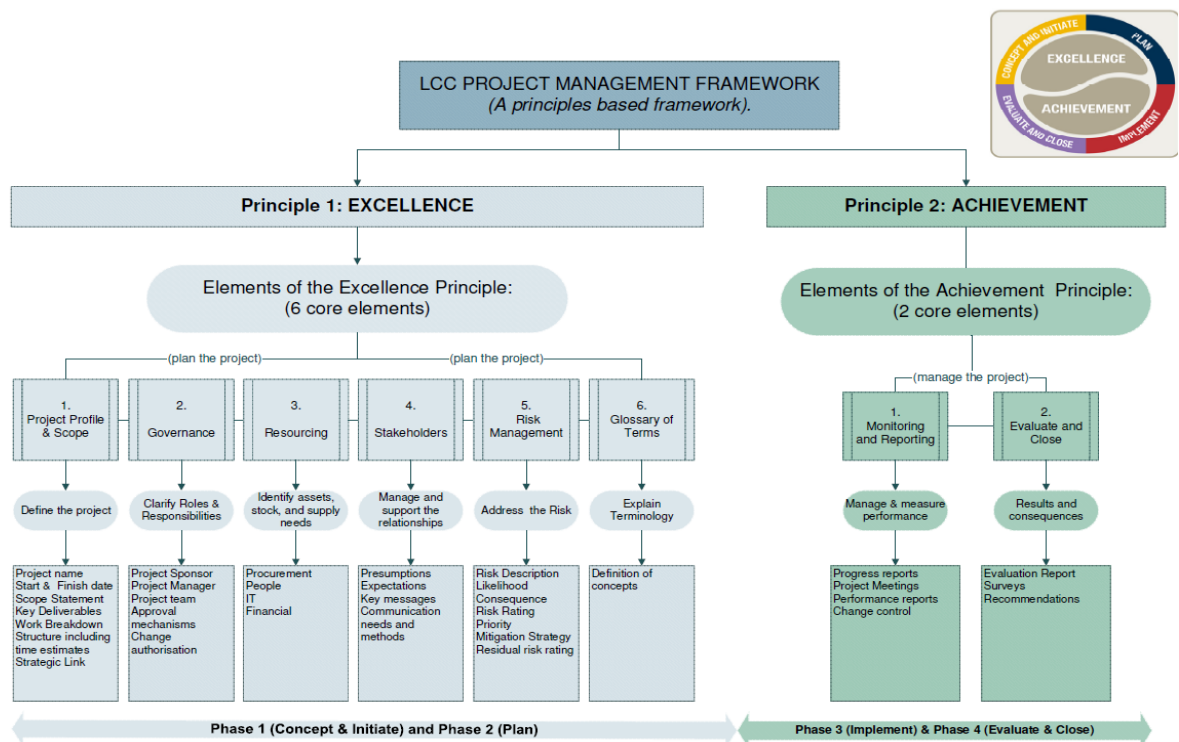

CHECKPOINT

Some key steps that may need to be completed in Phase 4:
(Evaluate and Close)

- ✓ Complete project evaluation and closure section of your project plan template
- ✓ Formal acknowledgement and thanks to project team and stakeholders
- ✓ Conduct evaluation survey if necessary
- ✓ Stand-alone evaluation report if required

SECTION 3 – PROJECT MANAGEMENT FRAMEWORK

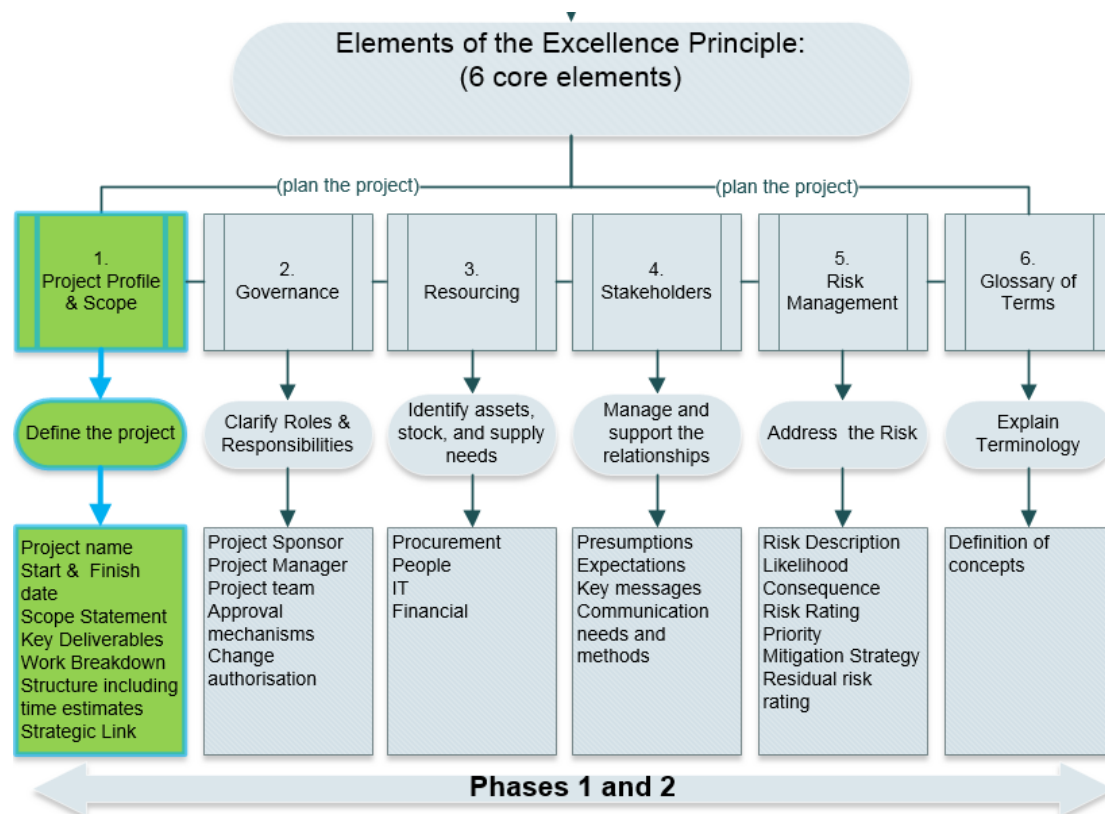

The **Project Management Framework** (see figure 6 below) was developed to enable Council to deliver a consistent and coordinated approach to project management throughout the organisation. The framework, which has been developed to reflect the project lifecycle phases, incorporates two principles (Principle 1 - Excellence and Principle 2 - Achievement). Each principle has several core elements which are described on the following pages.

3.1 Principle 1 – Excellence

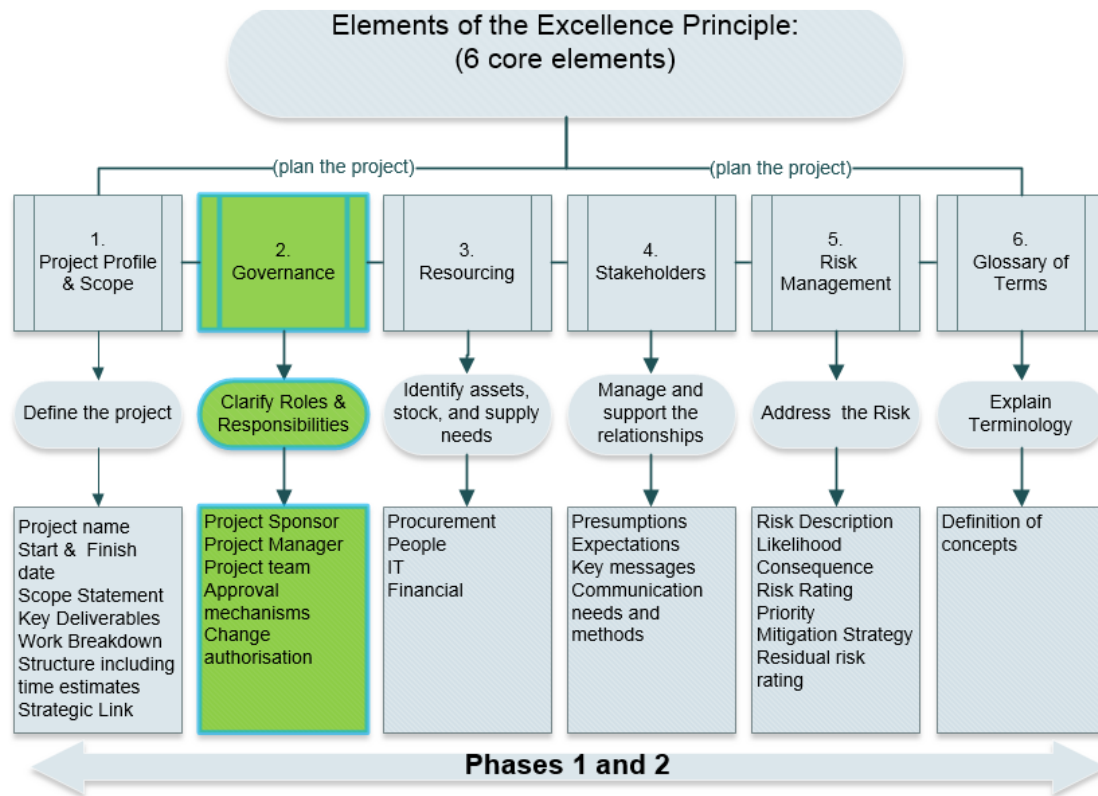

The principle of Excellence is addressed in phases 1 and 2 of a project's lifecycle (i.e. Phase 1: Concept/Initiate and Phase 2: Plan). There are **six core elements** that help define excellence in our project management framework. Each core element is described below:

Principle 1: Element 1 – Project Profile and Scope

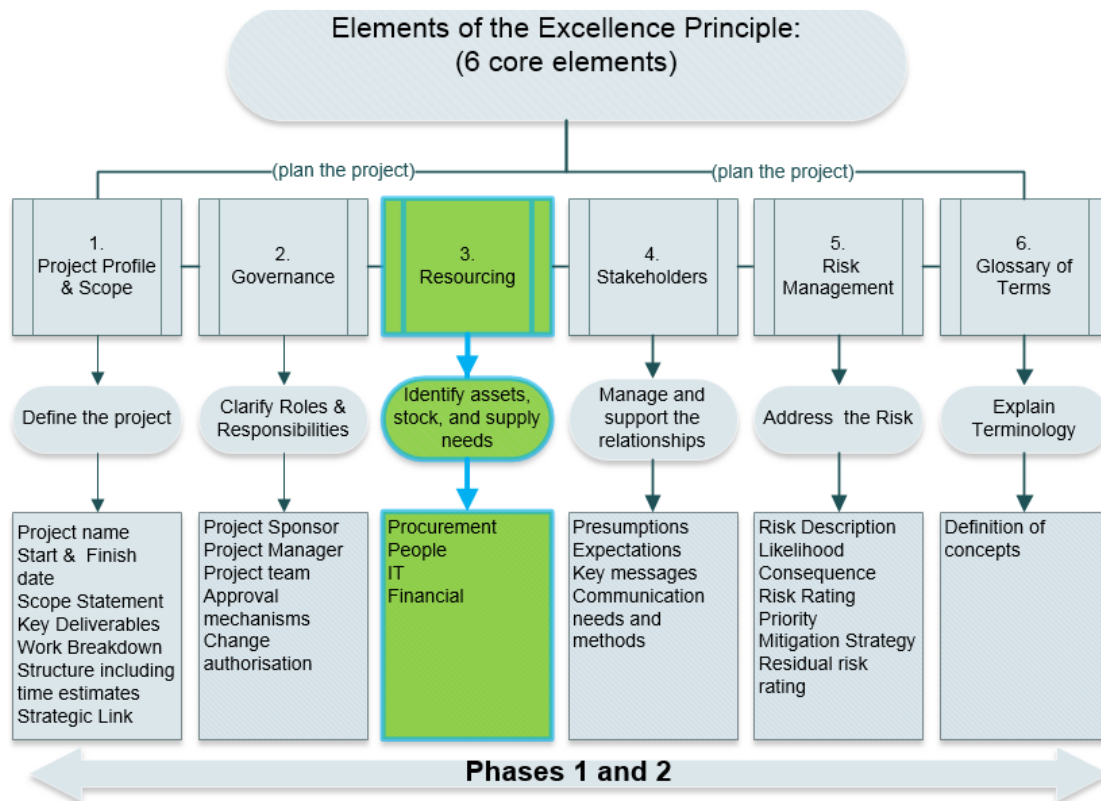

This element is about **DEFINING THE PROJECT**, naming the project, confirming the start and finish dates and finalising the **Scope Statement**. You may consider referring to background information, results of feasibility studies and any other relevant research to clarify the need for the project. You would be outlining the key milestones of the project and the WBS including time estimates. For this element, you would also determine how or if the project has a strategic link to Strategic Plan 2018 – 2022 or the Annual Municipal Plan.

Principle 1: Element 2 – Governance

This element is about detailing the **ROLES AND RESPONSIBILITIES** of the project team. It is also about clarifying the roles and expectations of the project manager and sponsor. Expectations around decision making and approval processes will also need to be clarified and documented. You will also document the processes and procedures for making any new or unplanned changes (**change control**) during the life of the project.

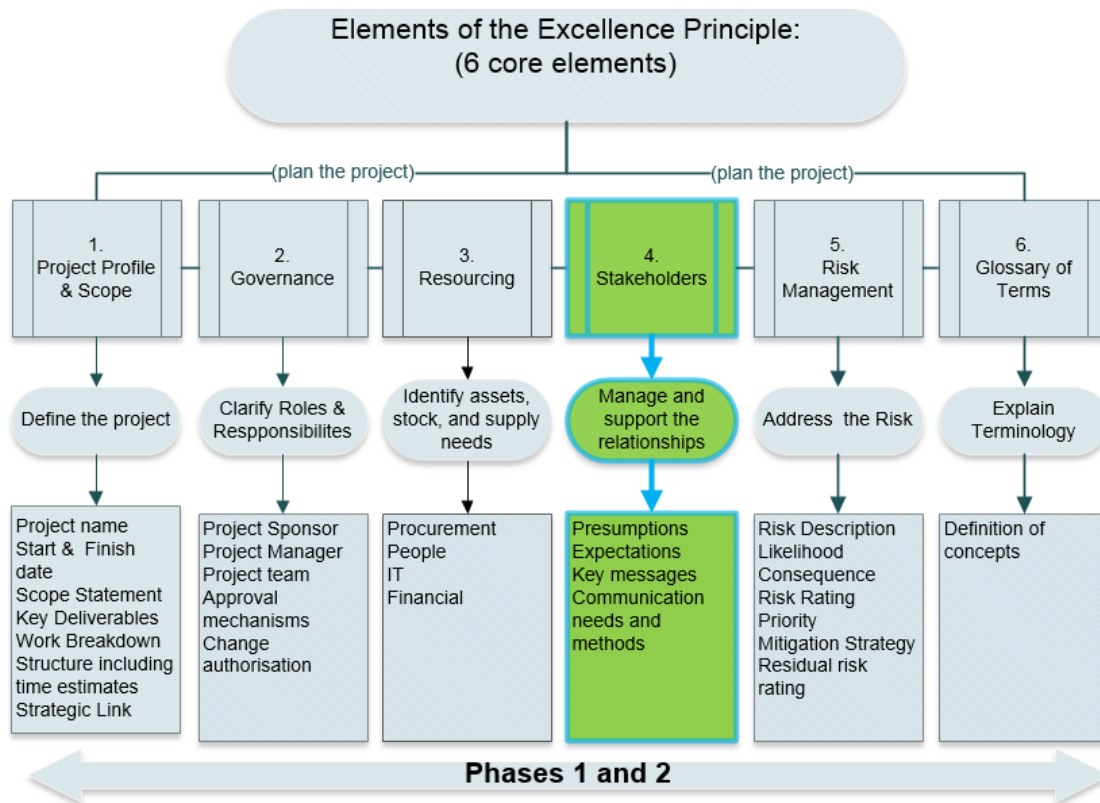

Principle 1: Element 3 – Resourcing

This element details the **RESOURCES** required for the project. Having people with the appropriate skills and capabilities to carry out the project work is essential. Consider existing skills and capabilities within your own team and the support of people from other branches before looking for external resources. Financial resources must also be considered and documented.

The **BUDGET** estimates must be more accurate and you would move from the Rough Order of Magnitude (ROM) estimate (-25%/+40%) established in the Concept stage to a **definitive estimate**, which is a more accurate estimate of all financial costs to within a variance of -5/+10%. Also consider what technological or other physical resources are required to ensure the success of the project. It is also important at this time to consider any resourcing risks associated with the project, so that more detailed assessments can occur in the Plan phase of the project. When you are required to use external suppliers or consultants for a project, you will be required to follow corporate requirements for **procurement**.

Principle 1: Element 4 – Stakeholders

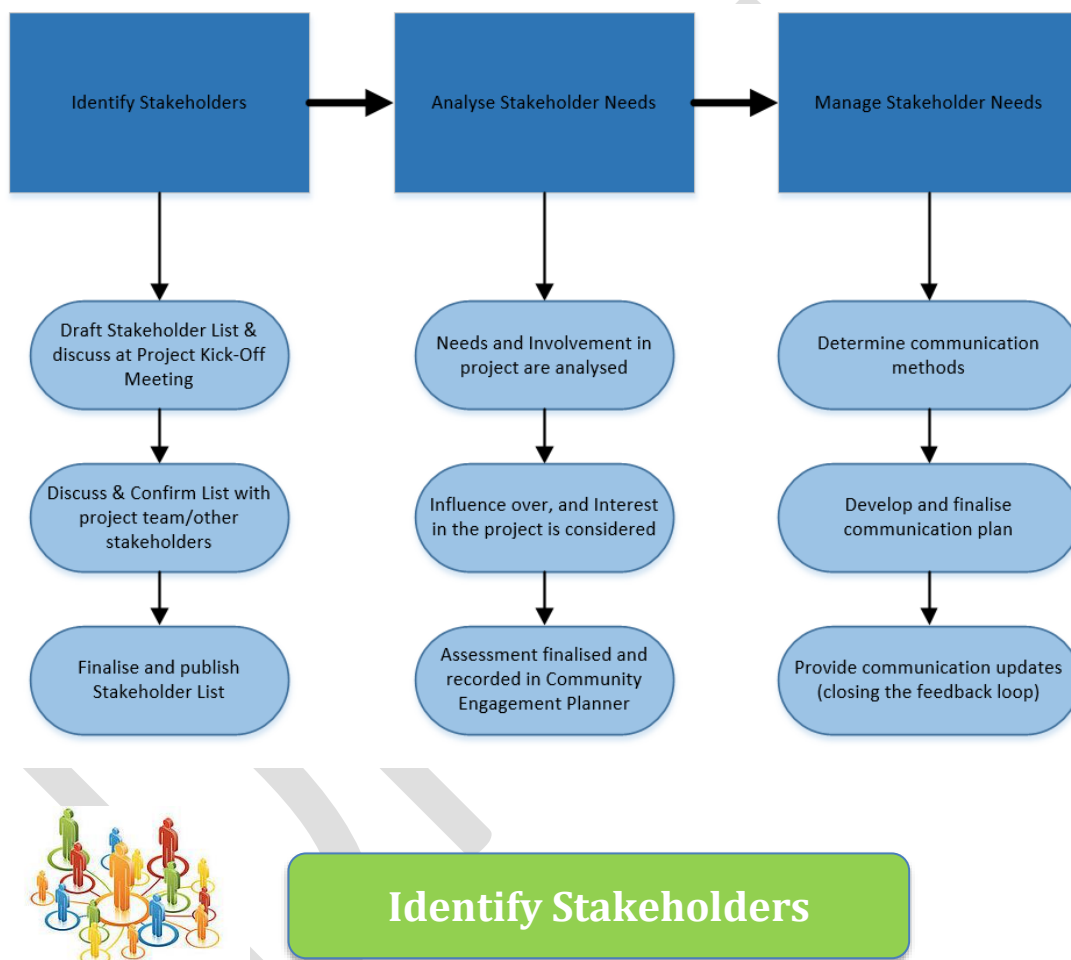

This element considers both **INTERNAL AND EXTERNAL STAKEHOLDERS** who contribute to, have an interest in, or may be impacted by the project. Details captured for this element include clarifying who the relevant stakeholders are, how they are to be engaged and the type and frequency of communication and feedback mechanisms. A Community Engagement Assessment needs to be conducted and this must occur in consultation with the Community Engagement Program. For small or non-complex projects, the **community engagement mini planner** can be used.

Key cause of project failure = Poor Stakeholder Management

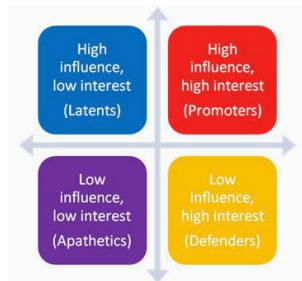

The most important factor of project success is the quality of the human relationships directly or indirectly involved in the project. Most projects that fail to achieve project success (on time, on budget, to specification), fail because of the poor management of human relationships. Relationships must be proactively managed to ensure the best chance of project success. As a project manager, you need to remember the golden rule: **'ENGAGE THE RIGHT PEOPLE IN THE RIGHT WAY'**. The Community Engagement Program provides advice in engagement for both internal and external stakeholders and have a range of skills and resources to assist you in this area.

As the project manager, it is crucial to **DEVELOP POSITIVE RELATIONSHIPS** with the sponsor, project team and project collaborators. Anyone who has a stake in or will be influenced by the project will need to be engaged and their needs considered. The flow chart below and explanations that follow outline some of the key considerations when managing stakeholder relationships:

The project manager is responsible for bringing together the project team and organising a kick-off meeting for the project. One of the primary objectives of a kick-off meeting is to identify all project stakeholders and how the project impacts them. Any potential stakeholder will be contacted by either the project manager or project team member and their stakeholder status assessed. The stakeholder list must be outlined in the Community Engagement Planner (see templates at the end of these guidelines).

Analyse Stakeholder Needs

Once the stakeholders have been identified, there are three key elements that need to be considered and include:

- ✓ **What influence over the project will the stakeholder have?** If they have a strong influence over the project, then they should be regarded as a 'Priority Stakeholder'.
- ✓ **What interest does the stakeholder have in the project?** If they have a high influence but show very little interest in the project, you will need to make them a 'Priority Stakeholder' and pay extra attention to the relationship to gain their buy-in and commitment to the project.
- ✓ **What are the stakeholder's needs and expectations?** If they have a high influence, you will need to ensure that you are well aware of their needs and document these. Some stakeholders may have little influence and may take little interest in the project, but they could be highly impacted by the project implementation and outcomes.

Manage Stakeholder Needs

The other key issue for project managers is the impact of unrealistic stakeholder expectations which can be devastating to the success of your project. Knowing the expectations and clarifying the project's key deliverables is one way to

MANAGE UNREALISTIC EXPECTATIONS.

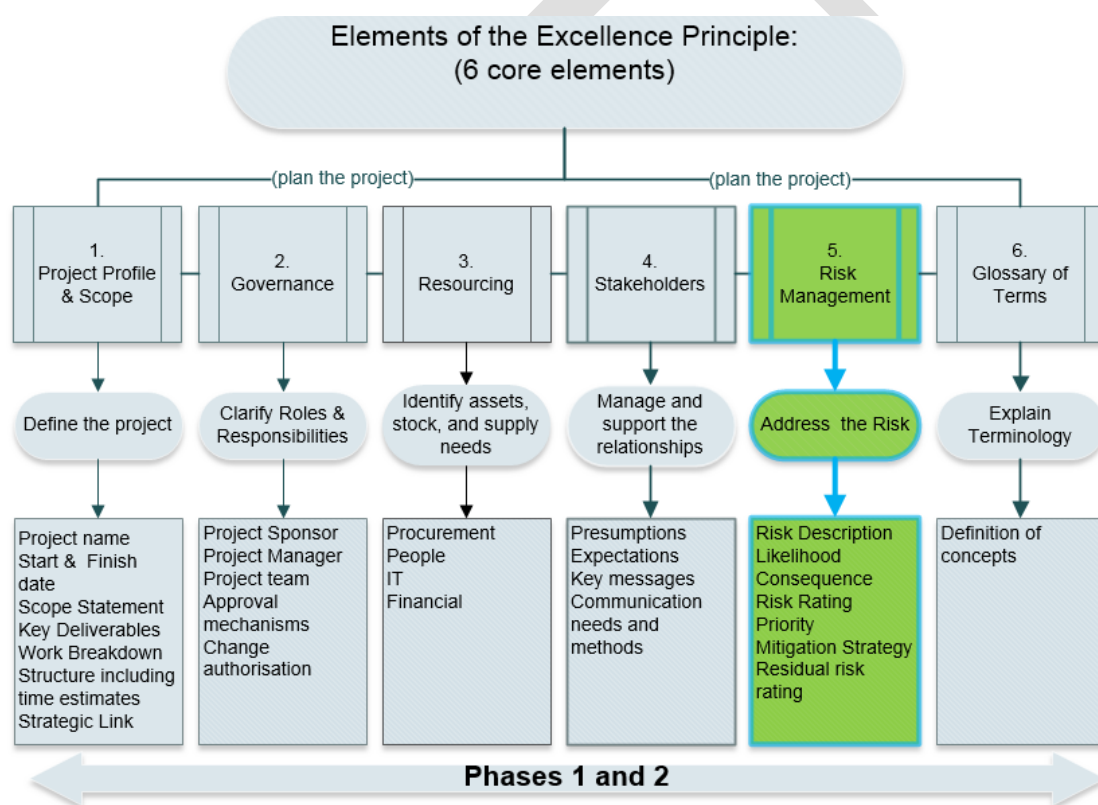

You will need to confirm the level of engagement of each stakeholder group and the most appropriate way to engage them.

Expectations Ahead!

Once you have determined the needs of each stakeholder and you have clarified the expectations, you now need to manage the stakeholder's needs. You need to **KEEP THE STAKEHOLDER INFORMED** to the level that is appropriate (determined by the level of influence they have over the success of your project) and continue to manage their expectations. Unrealistic expectations need to be addressed immediately and stakeholders may need to be reminded of the agreed project deliverables. As project manager, you need to ensure that there is a process in place that enables the project team to report back on what they have achieved. This will be an ongoing process for the duration of the project. The Community Engagement Program can provide excellent advice on how to analyse stakeholder needs.

Principle 1: Element 5 – Risk Management

The focus of this element is about identifying and **ADDRESSING RISKS** associated with your project. Risks can relate to resourcing, stakeholders, laws and standards, scope and timeframes. Use the **corporate risk management matrix** when assessing risk. The use of this matrix will promote a consistent risk methodology across Council. The **Risk Management Guidelines** are used to help you manage risk. Where projects have rated high or extreme risks, you are required to engage with the Corporate Risk and Insurance Program to complete

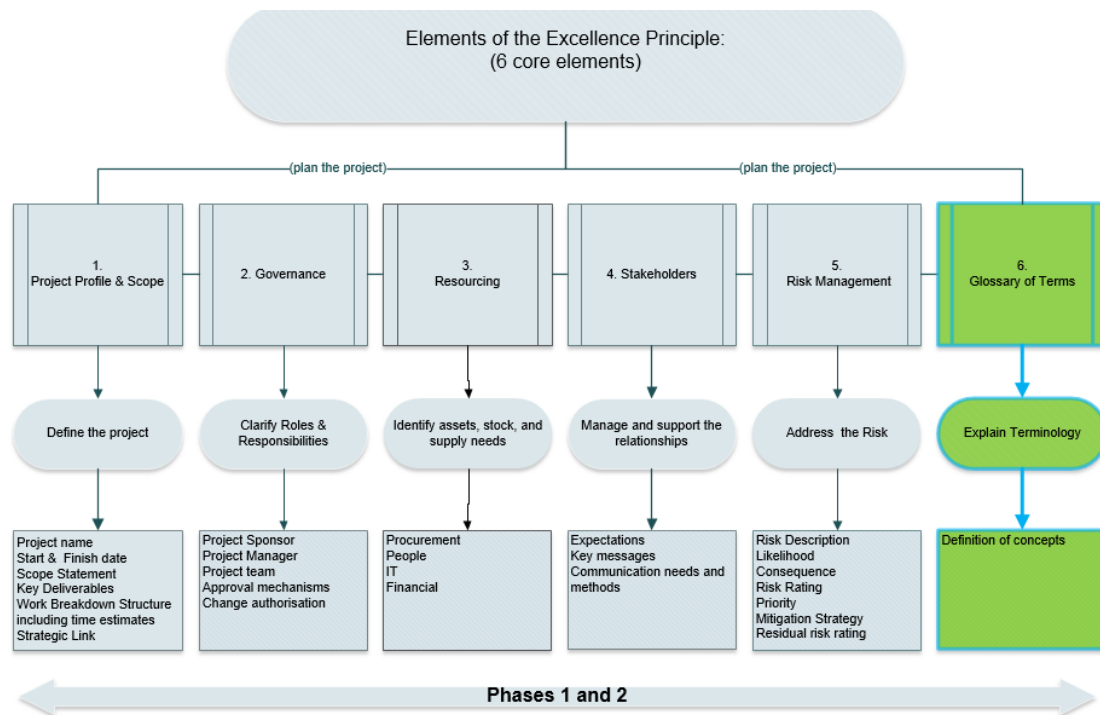

the **corporate risk report form**. There is also a tool to assist you with the management of **Controls and Treatments**.

Capital work projects such as infrastructure, buildings, parks and roads and some community-based projects that provide service to people in the community, would need to consider **STANDARDS WITHIN LAWS** that might apply. For instance, a capital work project constructing a building, would require by law, formal certification at points within the construction phase and at completion phase of the project. There are laws that apply to **RECORD MANAGEMENT** in terms of storage and retention of documents. There are also risks that needed to be considered when **MAKING GOOD DECISIONS** as a public entity using public funds. Therefore, **LEGAL OBLIGATIONS** must be evaluated as part of your risk management framework when planning your projects. Another example would be organising a community event hosting food vendors. Again, the project would need to consider food handling and food safety standards as they pertain to law and consider the legal risks associated with food management when planning this type of project.

Some projects that Council undertake may involve using the 'personal information' of our customers, employees or business partners. Where a project involves personal information, a **PRIVACY IMPACT ASSESSMENT** will be required. Further information on Privacy Impact Assessment can be sourced through the Governance Advisor or by following the link: **Privacy Impact Assessment**.

Principle 1: Element 6 – Glossary of Terms

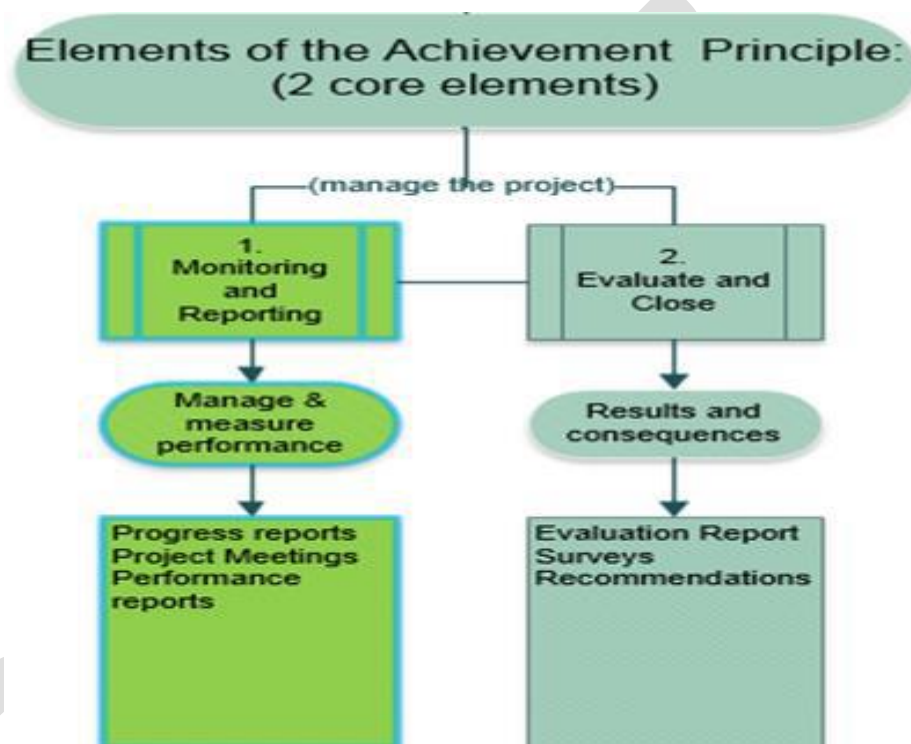

This element is about **DEFINING THE KEY TERMS** and concepts associated with a project. Interchangeable terminology and language may cause confusion and raise conflicting expectations among stakeholders. Therefore, it is important that consistent understanding of terms and concepts is promoted. This is particularly beneficial if involved external stakeholders have a different understanding of certain terms and concepts.

3.2 Principle 2 – Achievement

The principle of Achievement is addressed in phases 3 and 4 of a project's lifecycle (i.e. Implement and Evaluate/Close). There are **two core elements** that help define achievement in project management. Each core element is described below:

Principle 2: Element 1 – Monitoring and Reporting

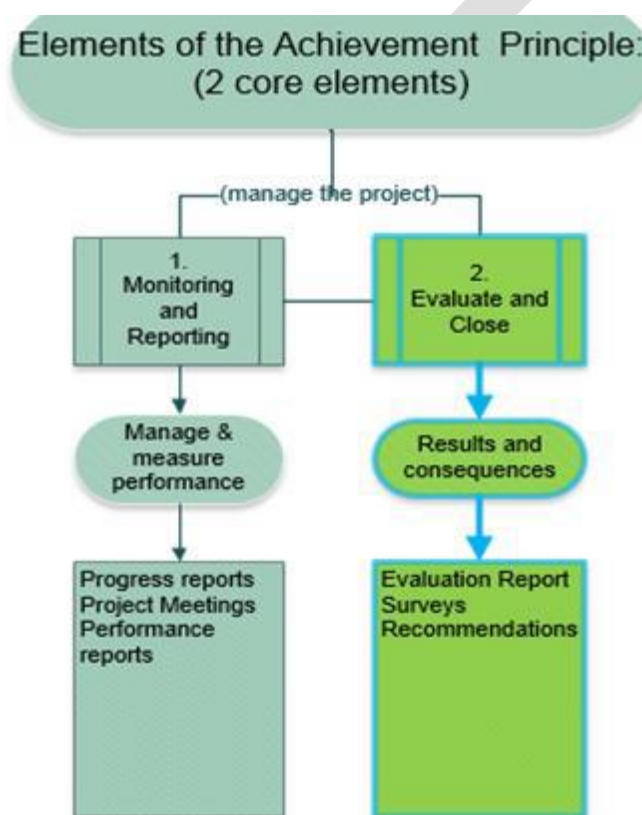

This element is about **MANAGING THE PERFORMANCE** of a project's delivery. It involves the development of project milestones and determining the mechanisms to be used to report on the project's progress. As a minimum, the project should be captured in the Operational Business Plan (and Individual Work Plans) and progress can be tracked using Council's performance reporting.

Other **MONITORING AND REPORTING** processes can include team meetings (and minutes), interim project reviews, stakeholder update reports, mid-project evaluations (if relevant), the use of change control plans, quality plans, daily logs, risk and issue registers, and lessons learnt logs. Also identify and confirm whether there is a legislative or funding requirement for monitoring and reporting progress of a project.

It is also important to **REVISIT THE PROJECT PLAN** during the monitoring and reporting phase to minimise the risk of 'scope creep' and ensure that the project is on track to achieve the agreed key deliverables. Another important consideration for the project's implementation is to consider how to bring it to life. For example, having visual charts or whiteboards with key project dates can help keep the project 'front of mind' for the project manager and broader project team

Principle 2: Element 2 – Evaluate and Close

This element focuses on **PROJECT CLOSURE**. It involves conducting a project evaluation to highlight the achievements of the project and whether the project has met the agreed key deliverables. The project plan has a final section that focuses on evaluating the project.

The results from the evaluation and assessment of lessons learnt (what worked, what did not) should be documented in the project closure section to promote a cycle of **CONTINUOUS IMPROVEMENT**. As part of the project closure, any future implications or actions requiring attention and recommendations for improvement should be clearly communicated.

SECTION 4 – Project Management Suite of Templates

A project management plan is a minimum/mandatory requirement for all projects to ensure there is clarity in what is to be delivered. Detailed below are all of the corporate templates available to assist you with managing a project.

TO BE COMPLETED

SECTION 5 – Glossary of Terms

Acceptance Criteria

The conditions that must be met before project deliverables are accepted.

Approval Mechanisms

Outlines who has decision-making authority within a project, including who has the authority to make day-to-day decisions, who has authority to change scope and how this decision-making is facilitated (e.g. informally the project manager can make decisions on how best to manage a project, whereas a change to scope would need formal sign off by a project sponsor and client).

Assumptions

An assumption is a belief of what you assume to be true in the future. You make assumptions based on your knowledge, experience or the information available on hand. These are anticipated events or circumstances that are expected to happen during your project's lifecycle.

Benefits

The value to the customer, community or organisation.

Business Case

Captures the reasoning for initiating a project or task and is an argument to convince a decision maker to approve a project. The needs and benefits are outlined in the business case.

Change Control

The process of planning for and coordinating a change to a project to limit its effect on the success of the project. This process involves managing changes when and as they occur.

Client

The person who ultimately authorises or requests a project is usually the person who funds the project.

Communication Mechanisms

The processes used to ensure that the stakeholders are informed of the progress of the project.

Community

The word 'community' defines individuals and groups of people; stakeholders, interest groups and citizen groups. A community may be a geographic location (community of place), a community of similar interest (community of practice), or a community of affiliation or identity (such as industry or sporting club).

Community Engagement Planner

The Engagement Planner is a tool to assist with managing complex projects and consider all stakeholders, project needs and identify any project risks that need to be addressed.

Constraints

Constraints are limitations imposed on the project, such as the limitation of cost, schedule, or resources, and you have to work within the

boundaries restricted by these constraints. All projects have constraints, which are defined at the beginning of the project.

Continuous Improvement

Is a method for identifying opportunities for streamlining work and reducing waste.

DRAFT

Need further assistance?

For further information or assistance on:

- ✓ using the project management guidelines and templates;
- ✓ information on risk management;
- ✓ information and advice on legal obligations
- ✓ information and advice on Records Management

please contact the Corporate Services Governance Advisor;

For further information on receiving training in project management, please contact the Human Resources Manager within the People and Performance Branch.

For further information and advice on stakeholder engagement and management, please contact the Community Engagement Branch.

RMAC REPORT

Agenda Item Number:	8.4
Report Title:	Risk Register
Author:	Rebecca Taylor, Research and Policy Officer (WHS & Risk)
Recommending Officer:	Silke Maynard, Director Community and Corporate Services
Meeting Date:	1/09/2020
Attachments:	Attachment A – Risk Register

Executive Summary

To update RMAC on the risk profile, control and actions status as identified in the Strategic Risk Register.

The full Litchfield Council strategic risk register is attached (Attachment A). The summary dashboard provides updates as to the progress in implementing actions. There is a total of 28 actions with,

- 3 actions complete, and
- 25 actions on going.

Recommendation

THAT RMAC

1. Note the updated strategic risk register; and
2. Note the completed actions in the Risk Dashboard of the Strategic Risk Register, which will be removed from the action list with controls to be added where required.

Background

There are currently five risk profiles where the risk appetite is not yet achieved. This remains the same from the previous report to RMAC. Work continues on actions to address control ratings and potentially the risk level.

Risk Profile	Risk	Control
RP1 - Misconduct	Moderate	Adequate
RP2 - Business and Community Disruption	Moderate	Adequate
RP3 - Inadequate Environmental Management	Low	Adequate
RP4 - Errors, Omissions, Delays and Incorrect Advice	Moderate	Adequate
RP5 - External Theft and Fraud (inc. Cyber Crime)	Moderate	Adequate
RP6 - ICT Systems and Infrastructure Failure	Moderate	Adequate
RP7 - Failure to Fulfil Statutory, Regulatory or Compliance Requirements	Moderate	Adequate
RP8 - Inadequate Safety and Security Practices	High	Inadequate
RP9 - Ineffective and Unsustainable Financial Management	Moderate	Adequate
RP10 - Ineffective Management of Public Facilities / Venues / Events	Moderate	Inadequate
RP11 - Inadequate Records Management Processes	Moderate	Adequate
RP12 - Inadequate Project/Change Management	Moderate	Inadequate
RP13 - Inadequate Engagement Practices	Moderate	Adequate
RP14 - Inadequate Procurement / Supplier / Contract Management	High	Inadequate
RP15 - Inadequate Asset Sustainability Practices	High	Inadequate
RP16 - Ineffective HR Management / Employment Practices	Moderate	Adequate

There is a total of 223 controls, two more than previous report. The increase in controls is a result of removing the Risk Control; Procurement policies and procedures and replacing with the following Risk Controls;

- Tender Procedure
- Procurement Manual
- FIN03 Procurement Policy

A summary of control rating compared to the previous report is provided below.

Control Ratings Feb 2020		Control Ratings Aug 2020	
Row Labels	Count of Control Rating	Row Labels	Count of Control Rating
Unrated	0	Unrated	0
Adequate	149	Adequate	151
Excellent	29	Excellent	29
Inadequate	43	Inadequate	43
Grand Total	221	Grand Total	223

Current Issues / Actions / Treatments	Due Date	Responsibility		Comments & Review History
Review Developer Contribution Plan	Jun-18	Mgr Plan & Dev		<p><u>7 August 2018</u> Consultants have prepared a draft Developer Contribution Plan. Planning and Development Manager is currently reviewing for preparation to Council in October.</p> <p><u>February 2019</u> The new Developer Contribution Plan continues to be developed. Updates have been provided to Council. The detail of the contribution plan is 80% complete following a review of asset data and requirement of works assessment. Legal advice is required to be obtained and instructions for advice are being prepared. This is a complex project that has legislative requirements in its content and delivery and therefore is being processed in a manner to minimise the risk to Council of the plan being insufficient.</p> <p>Current target – completion by July 2019</p> <p><u>November 2019</u> Council's revised Developer Contribution Plan is currently under development and nearing completion. However, recently proposed amendments to the NT Planning Act propose changes to how fees noted within a DCP can be collected. It is also understood that updated Regulations that will accompany the amendments to the Act will result in changes to which assets Council can collect money for within a DCP. The proposed changes are expected to be of benefit to Council, allowing Council greater ability to collect fees from development contributing to upgrades and to collect money for all infrastructure assets requiring upgrades.</p> <p>Any DCP or changes to a DCP is required to undergo a 28-day public consultation prior to adoption. As a result, it is considered prudent to continue to develop the DCP with the proposed changes in mind. Then the finalised plan can be publicly exhibited and adopted once the changes are made to the NT Planning Act and associated Regulations. At this time, it is understood that the intention is for the updated Planning Act to be adopted in mid 2020, with the Regulations to follow shortly after.</p> <p>Legal advice is to wait until new act is passed then proceed with adoption. Expect completion September 2020.</p> <p><u>February 2020</u> Updates to Planning Act are due to be enacted by June 2020. Once enacted updates will need to be made to plan. Expect completion by October 2020</p> <p><u>September 2020</u> Now that the NT Planning ACT and Planning regulations have been updated by NTG, can proceed to finalising updated plan under the new requirements, for legal review and then community consultation if approved by Council.</p>

Litchfield Council Risk Dashboard Action Status Report

Implementation of Procurement Audit Findings	Jun-18	DCCS	<p><u>7 August 2018</u> 1. Councils procurement policy has been updated of which the draft document (attached) is presented for RMAC endorsement. Updates to the current policy include, a. inclusion of provisions for the appointment of a probity advisor by the Tender Evaluation Panel (TEP) b. removal of procedural items to be included in a procurement procedures document, and c. clarifying the documenting of justification when it is impractical to obtain three written quotations. Detailed references to legislation remain in the policy document due to the importance of ensuring all staff understand the context of the policy in relation to the legislation and their responsibilities. 2. Development has commenced on a procurement manual (table of contents attached). This manual will provide procedures for all Councils procurement activities including forms, templates and checklists. Procedural items from the current policy will be included. 3. Key procurement personnel (Works Controller and Asset Management Officer) have attended a three-day procurement training session hosted by the Local Government Association of the Northern Territory.</p> <p><u>November 2018</u> Procurement Policy Reviewed, Procurement manual in development, Responsibilities reviewed, Implementation of Roadmap</p> <p><u>February 2019</u> The Executive team are currently reviewing procurement responsibilities within the current organisational structure and capacity. This action will be refined with specific actions for implementation.</p> <p><u>August 2019</u> Procurement Improvement Committee established and progress. Report presented to RMAC at August meeting with progress on actions.</p> <p><u>February 2020</u> PIC minutes presented to RMAC at March meeting with progress.</p>
Asset management plans in progress	Jul-18	Mgr Inf & Assets	<p><u>7 August 2018</u> The Thorak Cemetery asset management plan is drafted and with the Director of Community and Corporate Services for review. Once this has been developed it will be used as a template for plans for other Council assets (Council offices, Waste Transfer Stations, MWF workshop etc.). This action will be replaced by individual actions for each asset management plan to be developed.</p> <p><u>3 October 2018</u> 1. Thorak Regional Cemetery – to be presented at Thorak Regional Cemetery Board meeting in September 2018 2. Roads – AMO is collecting background information now and will be drafted by November 2018 3. Plant & Equipment – Not yet to start but will be prepared by December 2018 4. Driveways – Not yet to start but will be prepared by December 2018</p> <p><u>February 2019</u> Scheduled for all plans is in place and progressing 1. Thorak Regional Cemetery 2. Roads – Asset Management Plan (AMP) drafted – critical elements to be considered through budget consideration process prior to finalising 3. Plant & Equipment – AMP drafted and replacement schedule being utilised to inform budget process 4. Driveways – AMP data collection, checking and updating underway Proposed target – the asset management plans are progressing to a schedule, with a target completion of December 2019 for all plans</p> <p><u>September 2019</u> Update on proposed targets to be presented to RMAC in Feb 2020</p> <p><u>February 2020</u> Report presented to March RMAC meeting</p> <p><u>September 2020</u> Asset management working group are meeting on 16/9/20. Will be reviewing membership and updating terms of reference for group. Working group will then review the prioritisation of the outstanding asset management plans.</p>
Review payroll procedures	Jun-20	Finance Mgr	<p><u>February 2020</u> New Action</p> <p><u>September 2020</u> The main procedures that were affected in the payroll audit and backpay have been reviewed. All other procedures to be reviewed - to be completed by December 2020</p>

RP1 - Misconduct

Jan-18

This Risk Theme is defined as:

Intentional activities in excess of authority granted to an employee, which circumvent endorsed policies, procedures or delegated authority.

This would include instances of:

- Relevant authorisations not obtained.
- Distributing confidential information.
- Accessing systems and / or applications without correct authority to do so.
- Misrepresenting data in reports.
- Theft by an employee
- Collusion between Internal & External parties
- Unauthorised and misuse of corporate systems and assets

This does not include instances where it was not an intentional breach - refer Errors, Omissions or Delays, or Inaccurate Advice / Information.

Potential causes include:

- Lack of Training
- Changing of Job Titles / Roles
- Delegated Authority Process Inadequately Implemented
- Disgruntled Employees
- Lack of Understanding
- Poor Internal Checks (Supervision, PO's and Delegated Authority)
- Password Sharing

Key Controls	Type	Owner	Date	Rating

RP2 - Business and Community Disruption**Jan-18****This Risk Theme is defined as:**

Failure to adequately prepare and respond to events that cause disruption to the local community and/or normal Local Government business activities. The event may result in damage to buildings, property, plant and equipment, lack of availability of key staff and/or interruptions to supply chain.

This does include;

- Lack of (or inadequate) emergency response / business continuity plans.
- Lack of training to specific individuals or availability of appropriate emergency response.
- Failure in command and control functions as a result of incorrect initial assessment or untimely awareness of incident.
- Inadequacies in environmental awareness and monitoring of fuel loads etc

Note: This does not include IT and/or communications systems and infrastructure related failures - refer "Failure of IT and/or Communication Systems and Infrastructure".

Potential causes includes:

- Cyclone, Storm Surges, Fire, Earthquake
- Terrorism / Sabotage / Criminal Behaviour
- Epidemic / Pandemic
- Extended Power Outage
- Economic Factors
- Loss of Key Staff

Comments

As rated by Workshop Attendees - 14/9/2017 - Consequence rating referred to moderate service interruption, reputation and environmental impacts.

Noting the risk refers to Councils ability to adequately and appropriately fulfil its role and responsibilities to prepare and/or respond to a disruptive event, not the disruptive event itself.

Current Issues / Actions / Treatments	Due Date	Responsibility
Develop Council Business Continuity Framework and Action Plan	Jun-18	Gov & Risk Adv

RP3 - Inadequate Environmental Management**Jan-18****This Risk Theme is defined as:**

Inadequate prevention, identification, enforcement and management of environmental issues. The scope includes;

- Lack of adequate planning and management of coastal erosion issues.
- Failure to identify and effectively manage contaminated sites (including groundwater usage).
- Waste facilities (landfill / transfer stations).
- Weed control.
- Ineffective management of water sources (reclaimed, potable)
- Illegal dumping.
- Illegal clearing / land use.

Potential causes include:

- Inadequate Management of Landfill Sites
- Lack of Understanding / Knowledge
- Inadequate Local Laws / Planning Schemes
- Inadequate Reporting / Oversight Frameworks
- Community Apathy
- Heavy Vehicles on Reserves

RP7 - Failure to Fulfil Statutory, Regulatory or Compliance Requirements

Jan-18

This Risk Theme is defined as:

Failure to correctly identify, interpret, assess, respond and communicate laws and regulations as a result of an inadequate compliance framework. This could result in fines, penalties, litigation or increase scrutiny from regulators or agencies. This includes, new or proposed regulatory and legislative changes, in addition to the failure to maintain updated legal documentation (internal & public domain) to reflect changes.

It does include the Local Government Act and all other legislative based obligations for Local Government. This does not include Safety & Health Legislation (refer "Inadequate safety and security practices") or any Employment Practices based legislation (refer "Ineffective HR Management / Employment practices")

Potential causes include:

- Lack of Training, Awareness and Knowledge
- Staff Turnover
- Inadequate Record Keeping
- Ineffective Processes
- Lack of Legal Expertise
- Councillor Turnover
- Breakdowns in Tender process
- Ineffective Monitoring of Changes to Legislation

RP8 - Inadequate Safety and Security Practices**Jan-18****This Risk Theme is defined as:**

Non-compliance with the Health and Safety Legislation, associated regulations and standards. It is also the inability to ensure the physical security requirements of staff, contractors and visitors.

Other considerations are:

- Inadequate Policy, Frameworks, Systems and Structure to prevent the injury of visitors, staff, contractors and/or tenants.
- Inadequate Organisational Emergency Management requirements (evacuation diagrams, drills, wardens etc).
- Inadequate security protection measures in place for buildings, depots and other places of work (vehicle, community etc).
- Public Liability Claims, due to negligence or personal injury.
- Employee Liability Claims due to negligence or personal injury.
- Inadequate or unsafe modifications to plant & equipment

Potential causes include:

- Lack of Appropriate PPE / Equipment
- Inadequate Signage, Barriers or other Exclusion Techniques
- Inadequate First Aid Supplies or Trained Staff
- Storage and Use of Dangerous Goods
- Rubbish / Litter Control
- Ineffective / Inadequate Testing, Sampling (similar) Health Based Req
- Inadequate Security Arrangements
- Lack of Mandate and Commitment from Senior Management

RP10 - Ineffective Management of Public Facilities / Venues / Events Jan-18

This Risk Theme is defined as:

Failure to effectively manage the day to day operations of facilities, venues and / or events. This includes;

- Inadequate procedures in place to manage the quality or availability.
- Ineffective signage
- Booking issues
- Financial interactions with hirers / users
- Oversight / provision of peripheral services (eg. cleaning / maintenance)

Potential causes include:

- Double Bookings
- Illegal Alcohol Consumption
- Managing Bond Payments
- Animal / Pest Contamination.
- Reliance on External Management of Facilities
- Access to Facilities / Venues.

Current Issues / Actions / Treatments	Due Date	Responsibility
Develop a contract management system	Jun-18	Mgr Inf & Assets

RP15 - Inadequate Asset Sustainability Practices**Jan-18****This Risk Theme is defined as:**

Failure or reduction in service levels of infrastructure assets, plant, equipment or machinery. These include fleet, buildings, roads, playgrounds, and all other assets and their associated lifecycle from procurement to maintenance and ultimate disposal.

Areas included in the scope are;

- Inadequate design (not fit for purpose)
- Ineffective usage (down time)
- Outputs not meeting expectations
- Inadequate maintenance activities.
- Inadequate financial management and planning.

It does not include issues with the inappropriate use of the Plant, Equipment or Machinery. Refer Misconduct.

Potential causes include:

- Skill Level and Behaviour of Operators
- Lack of Trained Staff
- Outdated Equipment
- Unavailability of Information and/or Parts
- Lack of Formal or Appropriate Scheduling (Maintenance / Inspections)
- Unexpected Breakdowns

Develop Asset Management Plan inc Asset costings to establish renewal program	Jul-18	Mgr Inf & Assets
Develop Inspection/Maintenance program	Oct-18	DIO

RP16 - Ineffective HR Management / Employment Practices**Jan-18****This Risk Theme is defined as:**

Failure to effectively manage and lead human resources (full/part time, casuals, temporary and volunteers). This includes not having an effective Human Resources Framework in addition to not having appropriately qualified or experienced people in the right roles or not having sufficient staff numbers to achieve objectives. Other areas in this risk theme to consider are;

- Breaching employee regulations (excluding H&S).
- Discrimination, Harassment & Bullying in the workplace.
- Poor employee wellbeing (causing stress)
- Key person dependencies without effective succession planning in place.
- Induction issues.
- Terminations (including any tribunal issues).
- Industrial activity.

Care should be taken when considering insufficient staff numbers as the underlying issue could be a process inefficiency.

Potential causes include:

- Leadership Failures
- Available Staff / Volunteers
- Single Person Dependencies
- Poor Internal Communications / Relationships
- Ineffective Performance Management Programs or Procedures.
- Ineffective Training Programs or Procedures.
- Limited Employment Market Availability
- Inadequate Induction Practices.
